

State North Dakota

1. The threshold will be determined to be met on Health Insurance Related Claims when the claims total \$272.00 or more. The types of coverage indicators are:
 - a. Hospital
 - b. Major Medical
 - c. Dental
 - d. Optical
2. The threshold will be determined to be met for Trauma code related claims when the claims total \$200 individually or accumulative.
3. The state agency requires that providers bill third party payers prior to submitting claims for payment to the Medicaid Program. Compliance with third party liability (TPL) billing requirements is determined through generic claim edits for TPL in the MMIS. Any TPL indication within the system, child support related or otherwise, suspends a claim. It is then placed in suspect status until third party performance of the provider is evaluated along with any collection procedures that may be appropriate.
